

Diamond Crystal® Sno-Paws® Ice Melter

Pet Friendly Ice Melter

Diamond Crystal® Sno-Paws® pet-friendly ice melter is specially formulated to keep people and pets safer. Its veterinarian preferred formula contains organic performance boosting chips to provide more melting at colder temperatures than urea alone. Sno-Paws® melts ice at the same low temperature as salt while having none of the harsh chlorides that can irritate pets paws. Its green tint allows you to easily see the granules to make applying even easier.

Diamond Crystal® Sno-Paws® pet-friendly ice melter:

- Works down to 5°F/-15°C; is a better melter than many other urea based melters
- Chloride and salt free; significantly less irritating than salt & other chlorides
- Available in an 8.25 lb jug

SIGNIFICANTLY LESS IRRITATING — THAN — CHLORIDE BASED ICE MELTERS					
FREE OF SALT AND CHLORIDE	LESS IRRITATING TO PETS PAWS	MELTS TO 5° F -15° C	EASY-TO-SEE APPLICATION	VETERINARIAN -PREFERRED- FORMULA

A Brilliant Choice™

**Directions for Use:**

Remove slush and as much loose snow as possible before ice melter application. Spread Sno-Paws® ice melter evenly across surface area using ½ - 1 cup per square yard, depending on ice thickness and air temperature. When ice and snow softens, remove slush and any excess ice melter from pavement for good concrete maintenance.

Storage information:

Diamond Crystal® Sno-Paws® ice melter should be stored tightly sealed to keep the product dry. Store in a dry place. Always store ice melters out of reach of children and pets.

Contains:

Urea, Sodium Formate, and Colorant.

Precautions and Best Practices:

Diamond Crystal® Sno-Paws® ice melter may be used to remove snow and ice from concrete sidewalks, parking lots and asphalt surfaces. However, all ice-melting agents work by reducing the freezing point of water. This may result in more frequent freeze-thaw cycling of the melted snow and ice, which can cause surface scaling of concrete. As such, use only on properly placed, cured and sealed, air-entrained concrete. To lessen the possibility of freeze-thaw cycling and potential damage, promptly remove slush as it is formed. DO NOT use on porous or improperly cured concrete, concrete less than one year old, precast concrete items, masonry, mortar, wood or other porous materials. As with any ice-melting agent, particular care should be used when grass and vegetation are adjacent to the deicing surface as excess application may cause damage.

Not for sale in Virginia.
